1. JobJo Project Overview

JOB-JO is aiming to reduce unemployment and poverty in remote areas in Jordan through the establishment of multiple Business Bureaus in the participating higher education institutions. These Bureaus will provide the necessary teaching and training services for unemployed graduates and re-qualify them to increase their job opportunities. JOB-JO also claims to have a special focus on women. The foreseen outcomes will effectively contribute to improving the capacity building process at the national level and to allow graduates to gain the skills and training needed for their profession.

Implementation of JOBJO is the stage where all the planned activities are put into action.

From implementation activities many skills will be obtained such as technical, scientific or communication skills. Also, Strength and opportunities are positive forces that should be exploited to efficiently implement JOBJO project. To specify weaknesses and threats are hindrances that can hamper project implementation and the Sustainability activities are designed to ensure that Jordanian institutions are committed, and have the ability to continue implementation of the outcomes of the project after its lifetime. And to ensure the sustainability, JOBJO project will produce newly prepared teaching materials to be trained to students from all disciplines.

2. Activity in Non-Partner Institution

Many activities were carried out in contribution with non-partners during the first 18 months of the project life.

2-1 Activity in Amman Alahliya University (AAU)-25-4-2019

The first part of this activity about what is the Erasmus plus projects, the second part about what is the JobJo project (aims, outcomes, partners and significant of soft skill) and the third part was presentation about communication skill.
