Work research

We studied 50 patient with colorectal carcinoma to identify the complication post operatively.

Regarding direct anastomosis & colostomy we studied 25 patient with resection of the tumor& end to end anastomosis while the other 25 we resected the tumor& we carried out colostomies .

Conclusion Postoperative complications in the case of resection direct anastomosis were less than colostomies.

Published articles

- Meckels diverticulum lithiasis 2005 - case report .
- conservative management of perforated peptic ulcer disease - (case repost 2005).
- Liver Hydatidcyst
- Torsion of wondering pediatric spleen.
