Course Description

This course is designed to provide the theoretical knowledge that will facilitate student development of management skills and enhances their own professional practice. Those with baccalaureate degrees in nursing will be prepared to participate in shared governance and autonomous work teams that may include members from other professions or occupations. They also are prepared to act as leaders in both resolution of organizational issues, including assessment of financial and clinical factors, and activities to advance the nursing profession. Their professional accountability goes beyond the individual patients and families to whom they provide nursing services. In order to fulfill these responsibilities they need education in elements of the administrative management of nursing service delivery and financial processes.

B. Objectives and Expected Learning Outcomes

Learning outcomes:

Nursing competencies

Systems-Based Practice:

Knowledge (K3c) Understands the relationship between the outcomes of one's own nursing care and work unit resources

Skills (S3b) Practices cost effective care and resource allocation that does not compromise quality of care

Skills (S3c) Collaborates with members of the health care team to prioritize resources, including one's own work time and activities delegated to others, for the purposes of achieving quality patient outcomes

Skills (S3d) Evaluates the outcomes of one's own nursing care

Attitudes/Behaviors (A3c) Values the management of one's own time as a critical work unit resource in delivering patient care

Objective:

Upon completion of the course, the student will be able to:

- 1. Know the common management terminology and theories.
- 2. Know the different organizational design for structuring nursing service, and the impact of each on the delivery of nursing care.
- 3. Understand the different theories and styles of leadership, and act as an effective leader in the improvement of nursing services.
- Assess the care delivery system such as staffing and patient classification system, and budgetary issues including cost effectiveness and quality improvement.
- 5. Increase awareness of the principles, methods and techniques involved in nursing organization, utilization, and development and appraisal process.
